Launch scope and prices

The planned Paddle launch covers personal Plus subscriptions only. Free remains available without payment. Purchasing is not live until account verification and the payment integration are complete.

Plan	Price in USD	Billing period	Computers
Free	\$0	No subscription	2
Plus monthly	\$4.99	Every month	5
Plus annual	\$39.99	Every year	5

Prices are US launch base prices per personal account. The final amount, currency, applicable tax and renewal conditions will be shown before purchase. Monthly and annual subscriptions renew automatically until cancelled. The annual amount is charged together, not in monthly instalments.

What the plans include

Both plans include Wake-on-LAN, phone and desktop apps, a web dashboard, scheduled wakes and locally approved commands. Remote desktop, activity monitoring and screenshots are optional and require the relevant device permissions. Plus provides higher device, session and history allowances. See wakebeacon.com/#pricing for the feature comparison and current allowances.

Commercial / Enterprise

Commercial and Enterprise purchases are excluded from this Paddle launch. Free and Plus are personal, non-commercial plans. Business licensing requires a separate written agreement. There is no approved Enterprise tariff or price range to submit; any future commercial offer through Paddle will require a separate pricing submission before sales begin.

Refunds and cancellation

For Paddle payments, request review within 14 calendar days of the payment, including a renewal. Requests are assessed under Paddle's policy and applicable law; this is not an unconditional money-back guarantee. Cancel renewal separately through Paddle. Full policy: wakebeacon.com/refunds.
